LeetCode

Professional Summary

Full-stack developer and MCA candidate with expertise in PERN/MERN stacks and machine learning integrations. Proven track record of architecting scalable web platforms, engineering real-time systems, and deploying AI-driven pipelines.

Education

Maulana Azad National Institute of Technology Bhopal — **Aug. 2024 – Present**
Master of Computer Applications — CGPA: 7.95 — *Bhopal, Madhya Pradesh*

Makhanlal Chaturvedi University — **Sep. 2021 – May 2024**
Bachelor of Computer Applications — CGPA: 8.01 — *Bhopal, Madhya Pradesh*

Technical Skills

Languages: C++, JavaScript, Python, SQL, HTML
Frameworks/Technologies: React.js, Node.js, Express.js, TypeScript, Tailwind CSS
Databases: MongoDB, PostgreSQL, MySQL
ML/Data: NumPy, Pandas, Scikit-learn
Developer Tools: Git, GitHub, VS Code, Postman
Cloud & DevOps: AWS, Docker

Projects

Smart Campus Platform | *React, Node.js, Typescript, PostgreSQL, Prisma, Redis, Socket.io*

- Architected and deployed a scalable full-stack campus networking platform, enabling 1,500+ students to seamlessly discover, create, and manage academic clubs and peer events.
- Engineered a real-time messaging and notification system using Socket.io and Redis Pub/Sub, supporting instant global chat while utilizing BullMQ to offload heavy background tasks, preventing main-thread blocking and ensuring zero-latency message delivery.
- Developed a hybrid recommendation engine by integrating the Gemini LLM API to dynamically parse unstructured student bios into strict, normalized JSON data, significantly improving the precision of the club-matching algorithm
- Built secure, Role-Based Access Controls (RBAC) using JWT authentication and Prisma ORM, featuring a dedicated Admin flow to manage club approvals (Pending, Active, Rejected) and streamline platform moderation.

Nestara — Real Estate Platform | *PostgreSQL, Express.js, React, Node.js*

- Developed a full-stack real estate marketplace (PERN stack) featuring a robust buyer-seller inquiry system and a multi-step property posting form with drag-and-drop image uploads.
- Engineered an advanced property search engine with dynamic multi-parameter filtering, leveraging PostgreSQL Trigram (`pg_trgm`) and GIN indexing for highly optimized, typo-tolerant full-text location matching.
- Implemented personalized user activity tracking by designing relational database schemas to efficiently log and serve "Recently Viewed", "Recent Searches", and "Shortlisted" properties.

AI-Powered Resume Analyzer | *Python, Scikit-Learn, Gemini AI, NLP, Streamlit*

- Engineered an ML-powered ATS simulator, training a custom Random Forest Classifier on ∼1,000 real-world resumes to predict candidate job fit across 25 distinct roles with 99.4% accuracy.
- Built a responsive frontend using Streamlit and custom CSS, implementing interactive Plotly gauge charts to dynamically visualize ATS match scores based on Job Description overlap.
- Integrated the Google Gemini API alongside TF-IDF pipelines to extract missing skills, replace static data with dynamically recommended online courses, and generate personalized recruiter feedback.

Achievements

* Solved 500+ Data Structures and Algorithms problems across LeetCode and other platforms.
* Secured an All India Rank (AIR) of 445 among 40,000+ students in the highly competitive NIMCET exam.
